

# MDi

Sustainability for all

## AIRPOD 2.0

Live a new experience in urban mobility

# COMPRESSED AIR TECHNOLOGY

Live a new experience in urban mobility

« Because sustainability must be accessible to all »

With our disruptive high tech compressed air-based engine, AIRPOD 2.0 reaches a maximum speed of 80km/h and can stay on track for up to 100 km. With the zero turning radius of AIRPOD 2.0, you can be the nimblest driver of the city and whirl into the spot. Comfortably conditioned for two people, AIRPOD 2.0 offers you the best solution for your daily commuting and our environment.

2 seats

300 kg

80 km/h or  
45 km/h without licence

500 l

100-120 km  
300-360 km dual energy

## AirPod 2.0 Range

You can tailor your AIRPOD 2.0 into three variants: classic, pickup and cargo. Each variant intended to cover any need for professional use to daily activities.
